A WIDE RANGE OF PROGRAMS

UPEC offers a wide range of programs in science, technology, health, administration, international exchanges, law, economics and management, literature, languages and human sciences, social sciences and education, sports and urban planning.

LMD DEGREES

Training provided at UPEC is based on the LMD system: bachelor, master, doctorate (PhD).

These 3 degrees are recognized at the national and European levels. They are converted into ECTS credits (European Credit Transfer System), which represent a « European exchange currency » for students. This system allows you to earn credits during your stay at UPEC and have them validated in all European universities.

The three levels of training (Bachelor, Master, Doctorate) and short degree programs (BAC +2) fall within one of the five main areas of studies:

- Literature and languages
- Law, Economics and Management
- Health
- Humanities and Social Sciences
- Science and Technology
In addition to our regular study offer, there are several opportunities to study in English at UPEC, from single courses to entire programs that give students the opportunity to pursue a degree with a strong international dimension while living in France.

OTHER TYPES OF TRAININGS

University Institutes of Technology (IUT)
The IUTs prepare for DUTs (Diplômes Universitaires de Technologie) and validate an advanced technician training prepared in 2 years. They also offer the possibility to obtain a professional bachelor's degree (Licence professionnelle).

Medecine studies
A general medical degree requires nine years of post-secondary study.

Teacher training institute (INSPE)
Teacher training institutes provide professional teacher training in every subject as well as professional training of all people working in the French National Education system which goes from nursery school to secondary school.
